Multiple Students

When creating disciplinary incidents for multiple students, you can assign different action codes to each student. For instance, if you have two students that are in a fight and one of them has already met the district's tolerance level and needs to be assigned to DAEP, while the other student should be assigned to in-school suspension, you can create incident reports that are linked together. These will share an Incident Number for PEIMS reporting.

To Add a Disciplinary Incident for Multiple Students:

- Create the Incident for one student first, as you would for an individual student.
- When creating the report for each additional student, follow the same steps as for an individual student, except:
 - Enter the system assigned **Incident Number** given to the first student
 - Continue filling out the report, being sure to select the same **Disciplinary Reason** code from the drop down menu.
 - Select C Add Assignment, this can differ from student to student.
- Repeat as many times as needed for all students involved.
