

# Change Contract Types Mid Year

Contract Types are created to identify the number of days an employee will work, the number of checks the employee will receive during a fiscal year, the percent of the day the employee performs this duty, and how the pay is to be taxed during each pay period of the fiscal year.

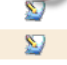

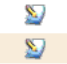

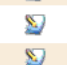

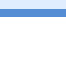

If any employee changes positions (duties) during the school year and the contract type is different than the current position that they currently hold, then:

- Original position(s) will need to be terminated
- Old contract updated to reflect correct number of contract days and contract period
- New contract type added for new position
- New position(s) added
